

Immaculate Heart of Mary School Diocese of Cleveland

Grades 3-6 Student Acceptable Use Policy

Immaculate Heart of Mary Grade School makes a variety of communications and information technologies available to students through computer/network/Internet access. These technologies, when properly used, promote educational excellence by facilitating resource sharing, innovation, and communication. Illegal, unethical or inappropriate use of these technologies can have dramatic consequences, harming the school, its students and its employees. The Acceptable Use Policy (“Policy”) is intended to minimize the likelihood of such harm by educating the School’s students and setting standards that will serve to protect the school. We firmly believe that digital resources, information and interaction available on the computer, network or Internet far outweigh any disadvantages.

Definition of school technology system: The school systems and networks (collectively, “System”) are any configuration of hardware and/or software whether used on or off school property. The System includes, but is not limited to, the following:

- telephones, cellular telephones, and voicemail technologies;
- email accounts;
- servers;
- desktop and laptop computer hardware and peripherals;
- software including operating system software and application software including without limitation video conferencing software;
- digitized information including stored text, data files, email, digital images, and video and audio files;
- internally or externally accessed databases, applications, or tools (Internet- or District-server based);
- school provided Internet access;
- school filtered public Wi-Fi;
- school provided Chromebooks;
- school provided personal digital assistants (“PDAs”), tablets, IPADs and similar devices;
- school issued access to third party websites (i.e., Google apps, Zoom, Flipgrid, Dojo, etc.) ; and
- new technologies as they become available.

Acceptable Use: Students are responsible for appropriate behavior on the System just as they are in a classroom or on a school playground. Communications on the System are often public in nature. General school rules for behavior and communications apply. It is expected that users will comply with school standards and the specific rules set forth below as interpreted from this policy, whether on or off of school property. A student is personally responsible for his/her actions in accessing and utilizing the school’s computer resources in accordance with Student Code of Conduct and may be subject to discipline for misuse of the System.

Access to communication system: Access to the school’s electronic communications system, including the Internet, shall be made available to students for educational and instructional purposes. Each school computer/device and Wi-Fi (available for students who bring in their own personal telecommunication devices) has filtering software that block access to visual deceptions that are obscene, pornographic, inappropriate for students, or harmful to minors as defined by the federal Children’s Internet Protection Act (CIPA). Filtered Internet access is provided to students as defined by CIPA.

Access to the School's computer/network/Internet is a privilege, not a right, and may be revoked at any time.

Scope of Use: The System is intended for use for educational and instructional purposes only. Incidental, personal use shall be allowed only so long as such use is appropriate for a school setting, non-disruptive to the school's operations and mission, and not in excess or to the exclusion of the student's studies or school responsibilities.

Inappropriate Use: Inappropriate use includes, but is not limited to, those uses that are specifically named as violations in this document; that violate the rules of network etiquette; or that hamper the integrity or security of the System or any components that are connected to it.

Transmission on the System, including through email (personal or school accounts), social media, web pages, blogs and/or forums, of any material in violation of any federal or state law or this Policy is prohibited. This includes, but is not limited to:

- cyber bullying;
- threatening, pornographic, harassing, defamatory or obscene material;
- copyrighted material, plagiarized material or materials protected by trade;
- the use of hardware and/or software which disrupts or interferes with the safety and welfare of the school community (even if such uses take place after school hours or off school property).

Vandalism or Mischief: Tampering with or theft of components from the System may be regarded as criminal activity under applicable state and federal laws. Any attempt to break the law through the use of a school computer/network/Internet account may result in prosecution against the offender by the proper authorities. If such an event should occur, the school will fully comply with the authorities to provide any information necessary for legal action.

Modification of Computer: Modifying or changing computer/device settings and/or internal or external configurations without appropriate permission is prohibited and may result in discipline and/or the revocation of access to the System.

Student Access: System access is provided to all students unless parents or guardians request in writing to the school principal that access is denied. When a student is in a classroom setting on school property, student Internet access will be under the direction and guidance of a school staff member. Students must adhere to the following guidelines when using the System on or off of school property:

Chromebook/Google Acceptable Use Policy

The focus of the Chromebook program at Immaculate Heart of Mary School is to help empower students to learn at their full potential and prepare them for the future in a world of digital technology and information. Using the Chromebooks encourages students to solve problems and think critically by stimulating analytical thinking. Technology immersion does not dim the vital role of the teacher in the classroom. It transforms the teacher from a director of learning to a facilitator of learning. Learning with Chromebooks integrates technology into the curriculum anytime, and anyplace. Learning results from the continuous dynamic interaction among students, educators, parents, and the extended community.

The policies, procedures, and information contained in this document apply to all Chromebooks used within Immaculate Heart of Mary School. Administrators and teachers may set additional requirements for computer use within the school and their classrooms.
